

# AXI-THERM

## **CLEAN 10**

### ***HYDRONIC SYSTEM AND BOILER CLEANER***

High dosage cleaner is for the most troubled systems. Suitable for all kinds of hydronic heating and cooling systems: traditional hydronic heating systems, chilled water systems, and geothermal systems.

### **FEATURES and BENEFITS**

- *Low concentration requirements (5 litres or 169 oz. treats 100 litres or 25 U.S. gallons of water. Dosage: 5 to 10%)*
- *Neutral pH does not corrode or damage gaskets, plastics, or metals (steel, copper, and aluminum)*
- *Eco friendly chemicals do not contain harmful or hazardous substances*
- *Easy to use, the heating system can be cleaned both with the boiler on or off*
- *Provides energy savings by removing limescale, sludge, and metal oxide incrustations inside the boiler and hydronic system*
- *Restores heat transfer and water circulation to their original levels*
- *Reduces maintenance costs*
- *Available in 5 litre (1.3 U.S. gallon) and 20 litres (5.3 U.S. gallon) bottles*

**INDUSTRIES LIMITED**

**DIRECTIONS:**

Add 1 to 2 bottles (5 to 10 Litres or 1.3 to 2.6 gallons) of AXI-THERM CLEAN 10 for every 100 Litres (25 gallons) of water (Dosage: 5 – 10 %). Use an AXI-THERM “INJET” to add the product to the system. It must circulate for 3 to 30 days when using the existing system circulator. The boiler may be on or off. Once the cleaning operation is finished, the system should be well drained and rinsed. Rinsing should continue until the water runs clear. Refill the system with demineralized water provided by an Axiom PUROPAL demineralizer. Add AXI-THERM PROTECT 1 for complete system protection against corrosion, limescale and sludge formation.

**ENVIRONMENTAL AND SAFETY INFORMATION:**

For professional use only.

Before adding to the system, ensure that the system water does not contain other chemicals. Lower concentrations do not yield satisfactory results. Higher concentrations have no adverse effects.

Do not use in potable water systems. Do not ingest. Do not dispose of waste through the environment. Keep out of reach of children. The product is not classified according to the Globally Harmonized System (GHS).

**ACCESSORIES:**

- INJET** – Reusable chemical injection bottle 2 litre (0.5 U.S. gallon) capacity
- BIO-TEST** – Detects the presence of bacterial colonies in low temperature hydronic systems
